

DETOXIFICATION: TAKING IT TO THE NEXT LEVEL

Successful detox is more complex and subtle from a biochemical and energetic perspectives than just considering Phase I/II genome and nutritional detoxification, although these topics form a strong underpinning.

2006 National Seminar Series

Back by popular demand

Linnette Beck is featuring her next series in Detoxification. For those of you who previously attended “The Fatrix”, you know not to miss “The Good, The Bad and The Ugly”. For newcomers to Linnette’s education, you will be amazed before the day is through. You will receive practical, helpful research, and treatment protocols that will enhance your practice and improve your patient outcomes. This is definitely the event to attend.

What others have to say about Linnettes Beck's Workshops!

“Rarely are we gifted with a PARADIGM shift in nutritional medicine. Linnette Beck has just done it! Synthesizing the principles of physical chemistry, biochemistry, physiology, anatomy and nutrition, Linnette has given us a clinically relevant understand of the Beta-Oxidizer Neurological Syndrome by opening our minds to “THE FATRIX”

Jack E. Young, MD, MD(H), NMD, PhD

“Dr. Beck has a passion and a vision for the frontier of health that exists at the bi-layered cell membrane. The frontier of health and healing exists at the cell membrane and the normalization of its structure and function. Dr. Beck loves and lives at the cell membrane and conveyed to me the information I need to be a more effective physician for neurological healing.”

George Moon, DC

IODINE – BROMINE – CHLORINE – FLUORINE THE ROLE OF HALOGENS IN HEALTH AND TOXICITY

In this one day, fast-paced seminar Linnette will provide an overview of the serious downstream consequences of “potentially toxic halogens”--fluorine, chlorine and bromine--on human health and as a possible “root cause” of resistant disorders. This seminar also provides a paradigm-shifting view on the role of iodine--an essential halogen. Iodine’s essential role reaches far beyond the thyroid.

Clinical Takeaways:

- Learn about the many toxic halogen sources in our environment
- Understand why toxic halogens are so harmful to human health
- Understand iodine deficiency induced by toxic halogens
- Learn about the different roles of iodine and iodide
- Understand iodine’s pivotal role in cellular evolution from single to multi-cell organisms
- Learn why the pituitary may not be the master gland after all
- Make up your own mind about “The Iodine Controversy” within orthodox and alternative medicine
 - Downstream consequences of iodine deficiency
 - Thyroid: Hyper, hypo, auto-immune thyroid disorders
 - Female health: Ovarian cysts, breast cancer, fibrocystic breast disease
 - Endocrine: Adrenal, prostate, pancreas
 - Neurological/Psychological: Mood, intelligence, neuro-degenerative disease
 - Common disorders: Cardiovascular disease, cancer, hypertension, diabetes
- Iodine testing
- Case studies

Linnette M. Beck AP, DOM, Dipl.Ac. (NCCAOM), Di.Hom., CAP, is a primary care physician focused on finding root-cause solutions to chronic illness in her patients. She has a busy practice at the Beck Natural Medicine Center in Melbourne, Florida, specializing in toxin-induced syndromes. Linnette implements therapies based on leading-edge research in biochemistry and biophysics. Her insatiable passion with the topic of detoxification has spanned over 14 years, initially sparked by her own life-threatening neurological illness. A licensed Acupuncture Physician in Florida, Linnette is nationally board certified as a Diplomate in Acupuncture (NCCAOM), and is a graduate of the Institute of Functional Medicine's Applied Functional Medicine in Clinical Practice Program (AFMCP). She received her Acupuncture Physician diploma from the Shanghai Institute of Chinese Medicine (1995) and her Oriental Medical Doctorate from the Open International University of Complementary Medicine (1997) through her graduation from the Acupuncture-Acupressure Institute in Miami, Florida. She holds numerous certifications in Acupuncture, German biological medicine, homeopathy, homotoxicology, functional medicine, electro-dermal screening (EDS/EAV), and addictionology. In addition to her medical-related training, she holds a B.S. in Business Administration from the University of Illinois (Urbana-Champaign) (1984), a MBA (1986) and M.S. Management (1989) from Florida Institute of Technology. She spends much of her free time studying medical topics.

Doctor's Data, Inc., (DDI) an independent clinical laboratory with over 30 years' experience, provides specialty laboratory testing and services for healthcare practitioners worldwide. A specialist and pioneer in essential and toxic elemental testing of multiple human tissues, the laboratory offers a wide array of functional testing. DDI's tests are utilized in the assessment, detection, prevention, and treatment of heavy metal burden, nutritional deficiencies, gastrointestinal function, hepatic detoxification, metabolic abnormalities, and diseases of environmental origin. DDI is a licensed CLIA laboratory with appropriate state certifications and participates in numerous quality assurance/proficiency testing programs including the College of American Pathology, New York State DOH and Le Centre de Toxicologie du Quebec.
