Phosphatidylcholine is a class of phospholipids that, while similar in many respects to other types of phospholipids, has some important health-promoting differences. The most distinguishable physical characteristics between simple phospholipids and phosphatidylcholine are the choline head and the unsaturated fatty acid chains that comprise the tail. Phosphatidylcholine is perhaps the most important molecule among tens of thousands of molecules that comprise a cell, accounting for nearly 50% of the cell membrane.*

Not only does phosphatidylcholine support healthy cell membrane composition and function, it also supports healthy choline levels and brain acetylcholine formation.[6,7] Furthermore, areas of research suggesting the health benefits that may be gained from phosphatidylcholine supplementation include liver function,[2,5] detoxification,[2,4,8] lipid metabolism and lipoprotein biosynthesis,[8,7] cytoprotection (gastric, beta cells),[8,9] and cytokine formation.[10,11]

Polyenylphosphatidylcholine (PPC) is a polyunsaturated phosphatidylcholine extracted from soybeans. As an excellent source of phosphatidylcholine, PPC supplementation has been widely studied.[2,4,7-9,12] PhosphaLine provides a patented and purified source of 100% pure PPC. PPC is thought to be functionally superior to other forms of phosphatidylcholine because of its content of 1,2-dilinoleoylphosphatidylcholine (DLPC) and linoleic acid, which binds to the c1 and c2 positions of the DLPC molecule.[2,3,1,12]

1,2-dilinoleoylphosphatidylcholine (DLPC) The quantitatively and qualitatively dominating molecule in PPC is DLPC, and PhosphaLine provides up to 52% DLPC. The presence of DLPC in PPC is the most important difference between PPC and typical phospholipids, such as triple lecithin and raw lecithin, and this difference is thought to be the main reason for the advantages PPC has over other phospholipids.[5,11,12] Increasing the DLPC content of cell membranes increases membrane fluidity and therefore positively influences membrane-dependent functions.[2] For instance, in vitro research suggests that DLPC can modulate the inflammatory response through nuclear erythroid 2-related factor 2 (Nrf2).[11] Other in vitro work revealed that PPC has strong antioxidant activity and that DLPC is mainly responsible for its protective effect.[11,9]

Fatty Acids As stated earlier, the fatty acid tails of soy-derived PPC provide polyunsaturated fatty acids. Each of our cells can produce many of the lipid tails, such as saturated (palmitic and stearic) fatty acids and monounsaturated (oleic and nervonic) fatty acids, but not essential polyunsaturated fatty acids.*

PhosphaLine™ Supplement Facts

Serving Size: 3 Softgels

<table>
<thead>
<tr>
<th>Amount Per Serving</th>
<th>% Daily Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Calories</td>
<td>30</td>
</tr>
<tr>
<td>Total Fat</td>
<td>3 g</td>
</tr>
<tr>
<td>Polyenylphosphatidylcholine (PPC) (from soybean lecithin)</td>
<td>2.7 g</td>
</tr>
</tbody>
</table>

**Percent Daily are based on a 2,000 calorie diet.
** Daily Value not established.

Other Ingredients: Glycerides and fatty acids (from safflower seed oil and sunflower seed oil), soy, ethanol.

Contains: Soy.

DIRECTIONS: Take two to three softgels daily, or as directed by your healthcare practitioner.

Consult your healthcare practitioner prior to use. Individuals taking medication should discuss potential interactions with their healthcare practitioner. Do not use if tamper seal is damaged.

STORAGE: Keep tightly closed in a dry place at controlled room temperature 15°-30°C (59°-86°F), out of reach of children.

DOES NOT CONTAIN: Wheat, gluten, yeast, animal or dairy products, fish, shellfish, peanuts, tree nuts, egg, artificial colors or artificial sweeteners, or artificial preservatives.

PhosphaLine™ Liquid Supplement Facts

Serving Size: One Teaspoon (about 5 mL)

**Percent Daily are based on a 2,000 calorie diet.
** Daily Value not established.

Other Ingredients: Glycerides and fatty acids (from safflower seed oil and sunflower seed oil), soy, ethanol, and DL-alpha tocopherol.

Contains: Soy.

DIRECTIONS: As a dietary supplement, take one teaspoon per day or as directed by your healthcare practitioner.

STORAGE: Keep tightly closed in a dry place at controlled room temperature 15°-30°C (59°-86°F), out of reach of children.

DOES NOT CONTAIN: Wheat, gluten, yeast, animal or dairy products, fish, shellfish, peanuts, tree nuts, egg, artificial colors or artificial sweeteners.
